Server vs Client Components

Learn by do.ing

```
<NavBar>
  <Search />
</NavBar>

<LatestPosts />

<GoogleMap />

<LatestNews />

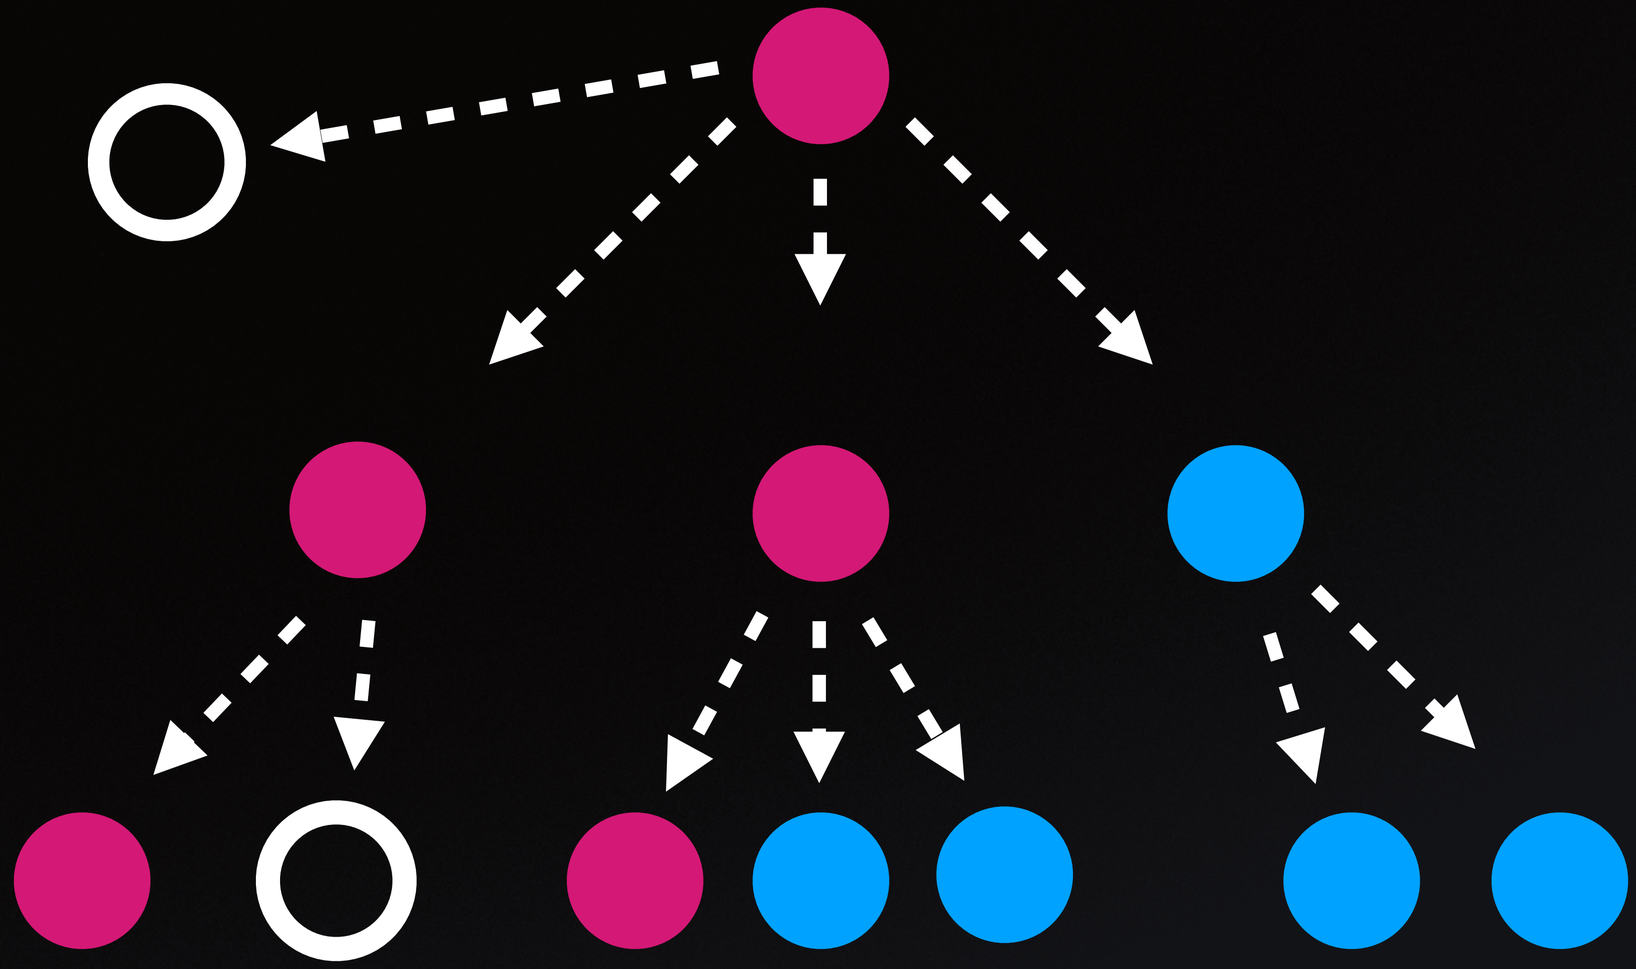
<NewsLetter />
```

Client Component

Server Component

Learn by do.ing

Client & Server components



Static Component

Client Component

Server Component

Learn by do.ing

SERVER COMPONENT: PROS

1. Can render content (HTML) on server
2. Improve Core Web Vitals
3. Direct access to DB and OS
4. 3rd party utils don't increase the bundle
5. Define how page should be pre-rendered

   static (SSG), dynamic (SSR), incremental (ISR)

Learn by do.ing

Next: cons

- Complex Architecture
- Required NodeJS
- Weird Errors
- Compile Time
